PROFESSIONAL SUMMARY

Software Engineer with hands-on experience delivering enterprise-grade web applications for government-scale systems, including the Ethiopian Postal Service (Ethiopost) CRM and Legal Automation platforms. Skilled in Next.js, React, TypeScript, Node.js, and modern database tooling, with a proven ability to build scalable, maintainable solutions in collaborative, agile environments. Passionate about clean architecture, secure systems, and driving real impact through technology.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java

Frameworks & Libraries: Next.js, React, Node.js, Express.js, Spring Boot, DeepLearning4J

Databases & ORMs: PostgreSQL, MySQL, MongoDB, Drizzle ORM

Front-End: HTML, CSS, Tailwind CSS, Bootstrap

Tools & Practices: Git, GitHub, GitLab, REST APIs, Agile/Scrum, CI/CD basics

PROFESSIONAL EXPERIENCE

Software Engineer

eTech S.C.

Feb 2026 – Present

Addis Ababa, Ethiopia

- Working as a full-stack developer on two separate enterprise projects for the Ethiopian Postal Service: **Ethiopost CRM** and **Ethiopost Legal Automation**.
- Developing scalable web modules using Next.js, React, TypeScript, and Node.js, following clean architecture principles.
- Designing and consuming RESTful APIs to integrate CRM workflows, legal case automation, and reporting features.
- Collaborating with cross-functional teams (backend, QA, product, and design) in an agile environment using Git and GitLab for version control and merge requests.
- Contributing to database design and schema optimization to ensure reliable, type-safe data access across services.

Software Developer (Paid Intern)

Muyalogy Technology

Dec 2025 – Feb 2026

Addis Ababa, Ethiopia

- Contributed to a **Job Management web application** built with Next.js, React, and TypeScript, working on a codebase that uses Drizzle ORM for data access.
- Diagnosed and fixed bugs across both frontend and backend layers, improving the stability and reliability of existing features.
- Collaborated with team members through GitLab, creating merge requests and coordinating changes with the team.

Data Center Intern (Paid)

Jigjiga University

May 2025 – June 2025

Jigjiga, Ethiopia

- Converted paper-based administrative records into a digital format, supporting the university's digital transformation efforts.
- Assisted in managing local networks and storage infrastructure in the university's main data center.

- Helped organize and label digitized files for easier retrieval by administrative staff.

Web Development Intern

Omishtu-Joy Tech Solutions

Sept 2024 – Oct 2024

Addis Ababa, Ethiopia

- Built and maintained responsive websites using React.js and Tailwind CSS.
- Contributed to UI improvements and tested cross-browser functionality across multiple screen sizes.

Software Development Engineering Intern

Dulcian IT Services & Consulting

Apr 2024 – Aug 2024

Addis Ababa, Ethiopia

- Built a face detection and recognition system using **Java Spring Boot** and **DeepLearning4J**, enhancing office access control.
- Diagnosed and fixed bugs across active Java Spring Boot projects, contributing to overall application stability.
- Collaborated with QA teams to test and debug applications, ensuring product stability before deployment.

SELECTED PROJECTS

Ethiopost CRM & Legal Automation — *Next.js, React, TypeScript, Node.js, PostgreSQL*

- Contributing to two enterprise platforms serving the Ethiopian Postal Service: a CRM for customer and service management, and a Legal Automation system for case and document workflows.

Pharmacy Inventory Management System — *PERN Stack (PostgreSQL, Express, React, Node)*

- Full-stack web app to manage pharmacy stock levels, sales, and expiry tracking with role-based access.

Face Recognition Access Control — *Java, DeepLearning4J, OpenCV*

- Facial recognition-based access control system deployed during internship at Dulcian IT, automating identity verification.

Airbnb Clone — *Python, JavaScript, PostgreSQL*

- Simplified Airbnb-style platform with user authentication, listing creation, and booking, applying OOP and version control.

EDUCATION

BSc in Software Engineering

Jigjiga University

2021 – 2025

Jigjiga, Ethiopia

GPA: 3.66 / 4.00

Relevant Coursework: Web Design, Software Project Management, Object-Oriented Programming, Data Structures & Algorithms, Operating Systems.

Certificate in Backend Engineering

ALX Software Engineering — Backend Specialization

Feb 2024 – Feb 2025

- Completed 12-month full-stack program with a 4-month backend specialization.
- Key coursework: Python, JavaScript, Systems Design, Databases, APIs, Node.js.

CERTIFICATIONS

- **ALX Software Engineering — Backend Specialization** (Feb 2025)
- **MERN Stack Certificate** — Omishtu-Joy Tech Solutions (Oct 2024)
